

John Warren

Software Developer

- 07746891363 • johnv8@hotmail.co.uk
- johnw-north.github.io/react-portfolio/ • github.com/johnw-north

SKILLS

- HTML
- CSS/SASS
- JavaScript
- TypeScript
- React Framework
- Node JS
- Git Version Control
- Rest API
- Linux
- Testing
- SQL

PROJECTS

Petrol Pal (Web App)

The goal was providing a clean experience for working out the cost of car fuel, between two user selected locations. Made with React and utilising Google Maps API for location requests. Additionally, an implemented card system was later developed to allow multiple journey calculations in one page.

Cyber Quest (Appointment Website)

Commercial website, designed to be easy to use for all ages and implement an appointment API. UX was a high priority needed multiple iterations of testing.
